

WEB DEVELOPMENT INTERNSHIP

A One-Month Internship in Web Development

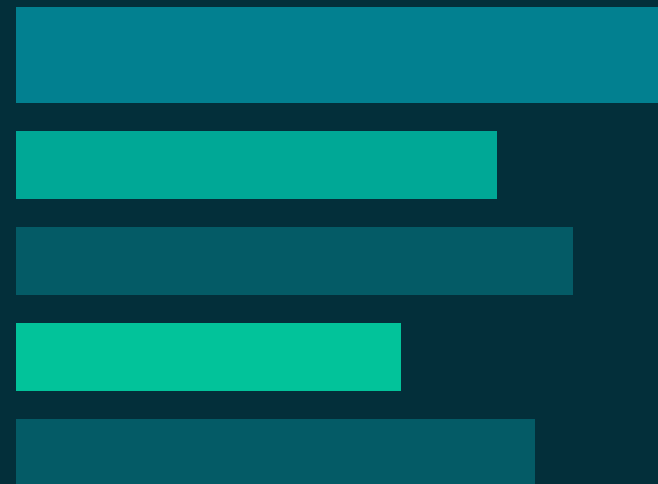

at VaultofCodes.in

Dristy Pal

Roll No. CS-2341784 | Batch 2026-27

B.Tech CSE, School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

HTML • CSS • JS

Introduction

Overview of the internship and host organization

Undertaken as part of the B.Tech CSE curriculum at IILM University, this one-month virtual internship began on 05 November 2025 with VaultofCodes.in, an AICTE-recognized internship platform.

The program delivered hands-on, industry-oriented exposure to front-end web technologies and real project workflows — going beyond classroom theory.

Work centred on live coding tasks in HTML, CSS and JavaScript, culminating in two submitted projects and an AICTE-verified Internship Completion Certificate with QR-code authentication.

ORGANIZATION PROFILE

VaultofCodes.in

An AICTE-recognized online internship and skill-development platform offering structured, mentor-guided virtual internships — and a recognized Google for Education partner.

Kartik Ahlawat
Founder

Varshita Singh
HR Manager

Certificates carry QR-code authentication verifying each student's performance and project record.

Problem Statement & Objectives

THE PROBLEM

Coursework emphasizes theory but leaves limited room to turn HTML/CSS/JS knowledge into complete, deployable, cross-device websites — a gap this internship was designed to close.

PROJECT OBJECTIVES

1

Gain hands-on, practical experience in front-end development with HTML, CSS and JavaScript

2

Design and build responsive web pages that render correctly across devices and browsers

3

Develop a personal portfolio website showcasing skills and projects

4

Implement a dynamic registration form with client-side validation and interactivity

5

Apply core UI/UX design principles in real project work

6

Gain exposure to real-world project workflows, from planning through testing and submission

Scope & Technologies Used

SCOPE OF THE PROJECT

Limited strictly to client-side (front-end) development:

- Structuring web content with HTML
- Styling and layout with CSS
- Interactivity & validation via JavaScript
- Cross-device / cross-browser testing

Out of scope: back-end development, database integration, and server-side deployment.

2

Projects
delivered

TECHNOLOGIES & TOOLS

HTML5

Structuring the content and layout of web pages

CSS3

Styling, layout design, and responsive interfaces

JavaScript

Interactivity, form validation, dynamic behaviour

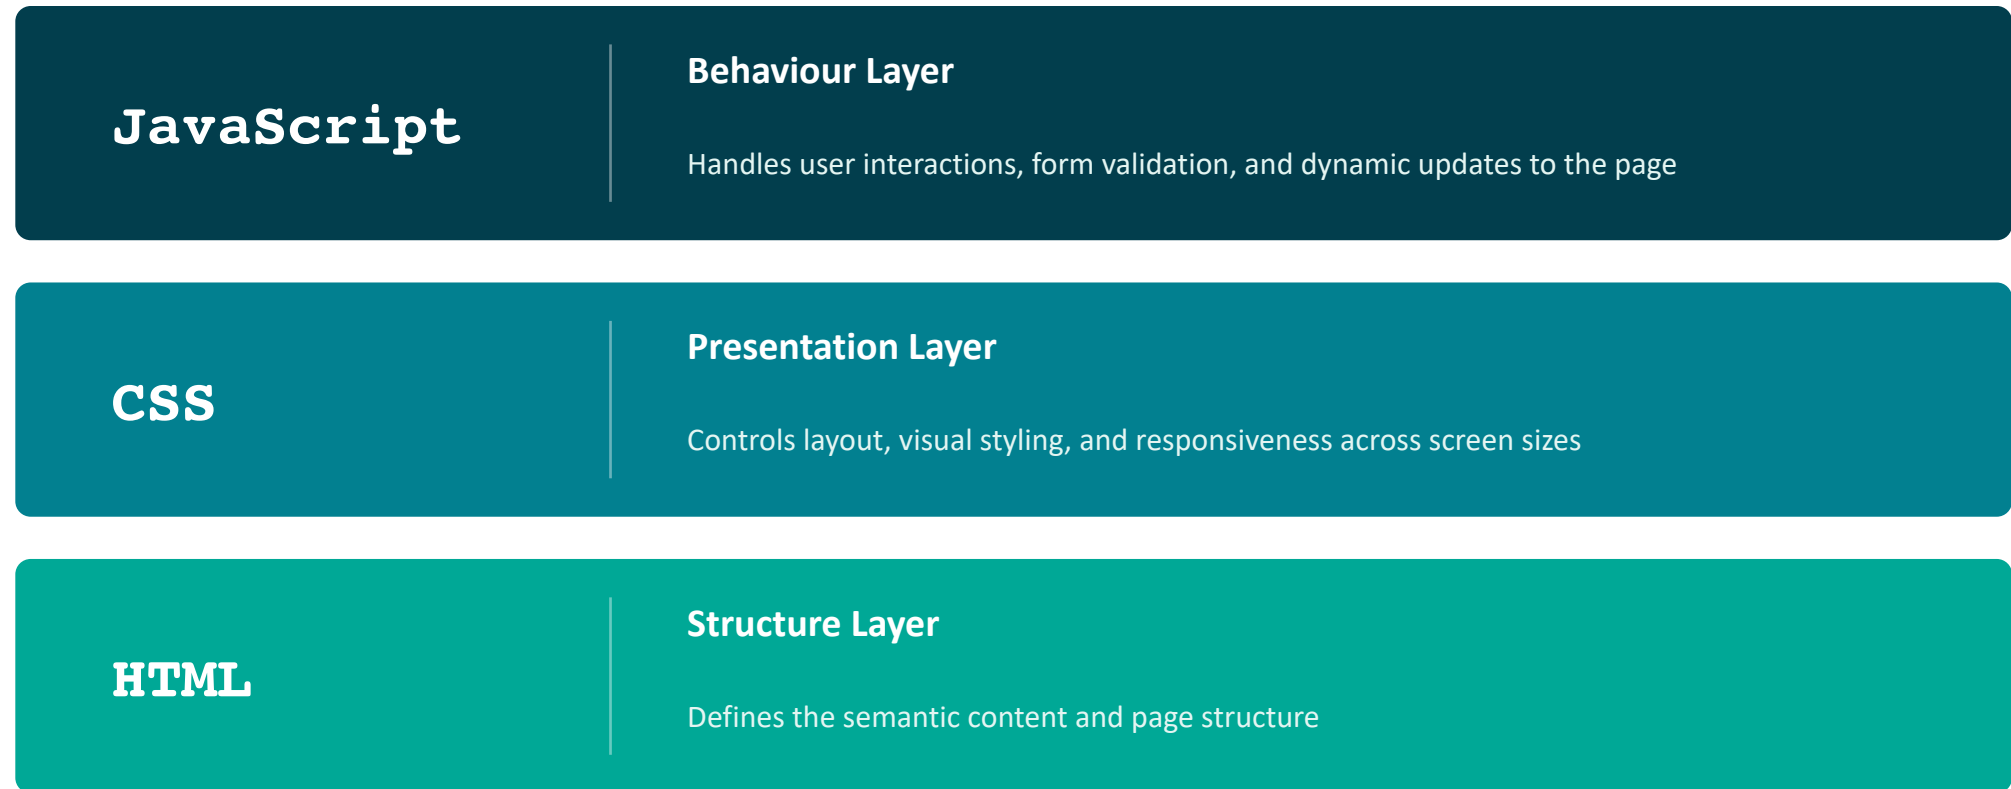

Editor & Browsers

Development and cross-device/cross-browser testing

System Architecture

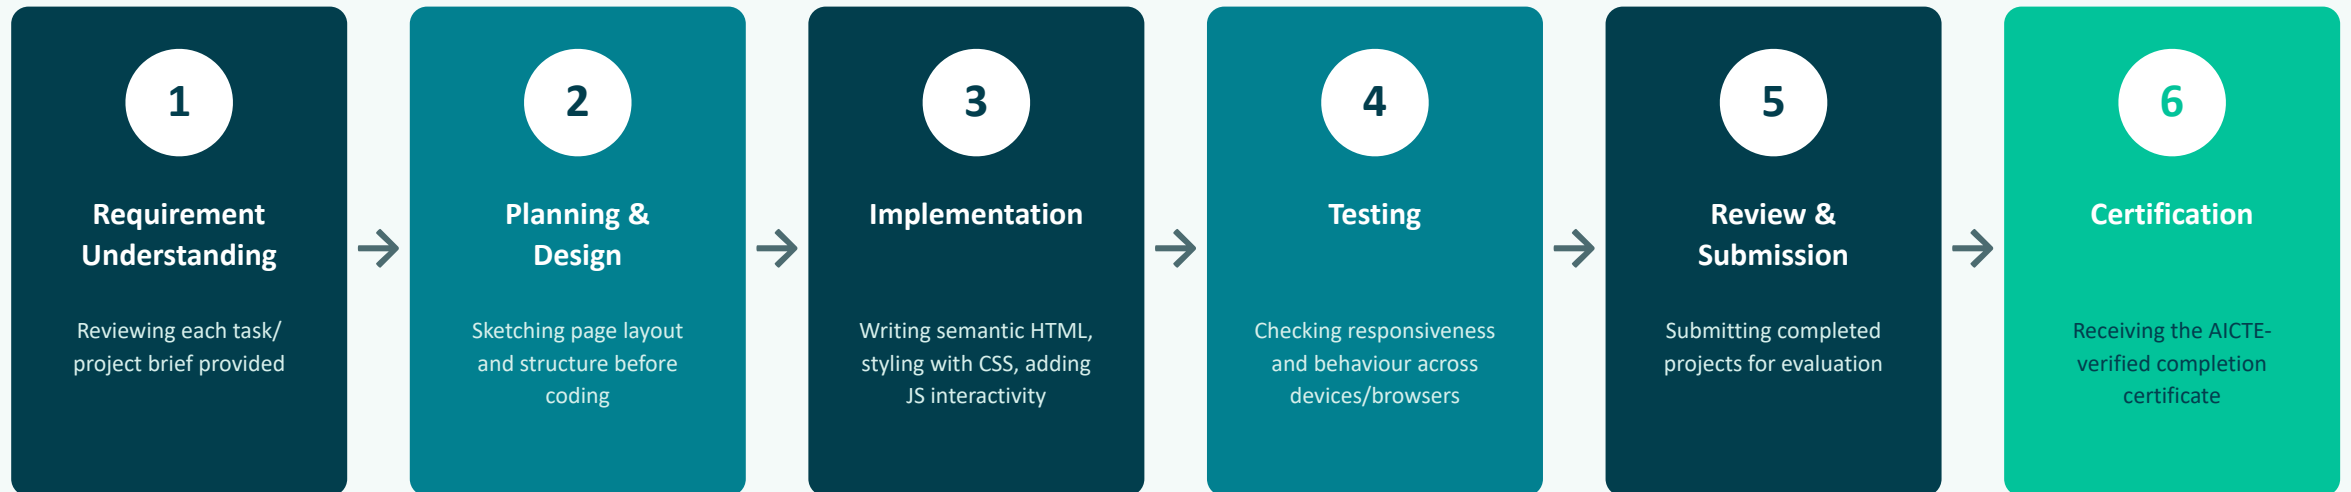

A simple, layered client-side architecture typical of static front-end applications

All three layers combine into the final deliverables — the portfolio website and the registration form — both running entirely in the browser, with no back-end server required.

Methodology

The six-stage workflow followed for each project

This end-to-end flow — from requirement gathering to certification — mirrors real-world, industry-style project workflows rather than a purely academic exercise.

Expected Outcomes

What the internship set out to deliver

1

Portfolio Website

A fully functional, responsive personal portfolio website

2

Registration Form

A dynamic form with working client-side validation and interactivity

3

Strengthened Skills

Practical strength in HTML, CSS, JavaScript, and front-end UI/UX principles

4

Industry Familiarity

Exposure to real-world, industry-style project workflows

5

Verified Certificate

AICTE-verified Internship Completion Certificate with QR-code authentication

Certification & Verification

AICTE-verified

Issued by VaultofCodes.in for the successful completion of the one-month Web Development internship, starting 05/11/2025.

QR-code authenticated

The QR code on the certificate links to the student's detailed performance report and project statistics — independently verifiable.

Recognized platform

VaultofCodes.in is a Google for Education partner, giving the certificate added institutional credibility.

Thank You
